

TELSPACE TO SPONSOR 2007 MVNO SUMMIT

Redmond, WA – July 28th , 2006 - telSPACE, an innovative MVNE provider of multi-service billing, rating, and customer care software solutions for the MVNO industry, today announced its sponsorship of the 2007 MVNO Summit hosted by Telecom IQ, IQPC. The 2007 MVNO Summit is scheduled for January 29th – 31st. After the tremendous success of the 2006 MVNO Summit in Las Vegas, telSPACE is stepping up to make sure that the sequel to this conference provides even more benefit for all who attend.

Paris Holt, telSPACE's Chief Executive says, "This sponsorship is very important to telSPACE as the company wants to ensure the success of the MVNO business model of which plays a large part in our companies success. MVNEs like us need to step up and help MVNOs ensure their long term viability in the telecom food chain. We will be working very closely with the Conference Director of Telecom IQ to ensure that the event provides maximum benefit for those who attend. Next year's 2007 MVNO Summit which is currently scheduled for January 2007, will include more product showcases than last year and a focus on growth strategies to ensure that MVNO participants receive maximum value from the show.

telSPACE has created a billing back office system that allows any company in any industry to add communications to their product line and become an MVNO (Mobile Virtual Network Operator). The system comprises a comprehensive back office network, including all operations functions such as automated customer activation, carrier procurement, fulfillment integration, billing and rating, MIS reporting, customer service and data rich features all integrated into one ubiquitous operating platform. telSPACE effectively uses the internet to automate the complex customer acquisition process, thereby allowing its clients to instantly penetrate new markets or expand service offerings.

"Next years 2007 MVNO Summit is planned to be twice as big as this years and we plan to have even more informative presentations that will help MVNOs along their path to success. With so many changes in telecom happening right now, we want to ensure that all companies who wish to be MVNOs or already are MVNOs have their own Summit that will help them form better business relationships which in the end could easily mean the difference between success and failure." says Mark Goldberg, IQPC Conference Director.

About telSPACE

Based in Redmond, Washington, telSPACE enables its MVNO clients using its proprietary turnkey back office infrastructure to sell, provision, fulfill, and care for multiple telecom services, including Pre and Post Paid Cellular, Internet, and Long Distance. In development for over 8 years, the company has used feedback from its 33 MVNO clients to refine its product and create a platform that provides core MVNO functionality that rivals any MVNE in the world.
